PROFESSIONAL PROFILE

Motivated software engineering professional with experience in front-end technology such as Angular, Angular JS and Spring MVC. My passion lies with making designs and mock-ups come to life in the browser. Prior experience in sales, customer service, and management. Agile practitioner.

Firm believer in utilization of data and analytics in our ever-changing strive forwards, particularly in light of recent events. Always looking to acquire new skills.

INTERESTS

My interests are playing & composing music, photography and mixed martial arts.

EXPERIENCE

Frontend Developer, Vista Musical Instruments, Caldecott Music Group
Jan 2022 - Present
Part of the E-commerce team.

Frontend Developer, Hackertrail
May 2021 - Jan 2022
Worked closely with team to successfully implement changes to internal & client facing recruitment platforms, namely an internal platform for managing potential candidates using Angular, where I worked closely with UI/UX designer to refactor existing forms. Also Implemented frontend screens for Boolean search functions, with encrypted browser caching to improve performance. I also worked on a client facing assessment platform using Angular 12, which was a from-ground-up redesign of an existing platform to facilitate tech recruitment assessment setup.

Enterprise Application Developer, Tata Consultancy Services
August 2020 - May 2021
Key team member involved in building of internal workflow applicaiton using Microsoft Power Platform. Successfully deployed application to internal O365. Subsequently provided post-launch support.

Front-end Developer/UI-UX Designer, Tata Consultancy Services
April 2020 - August 2020
Consulted Singapore-based utilities & marine company. Involved in creation of interactive dashboard using Angular to monitor client's customer's energy usage. Involved in UI/UX design of a project catalogue for new change request.

Business Analyst, Tata Consultancy Services
September 2019 - April 2020
Operating out of digital arm of a UK-based aircraft engine manufacturer, I was involved in agile software development process. I was tasked with the translation of software logic data into information comprehensible by the client. I was also involved in creating an extensive product management portfolio. This included, Market/Competitive Analysis, Product Development Roadmaps and Logo Designs.

Trainee Developer, Tata Consultancy Services
July 2019 - September 2019
Received extensive training in web development. Concluded programme with a 2-week agile sprint where I operated as the Agile Scrum Master.
